PROFESSIONAL SUMMARY

Data Analyst / Business Intelligence Analyst with experience in business analytics, financial analysis, and data-driven decision-making. Skilled in **Power BI, SQL, DAX, Power Query, SSIS, SSRS, Excel, and data modeling**, with hands-on experience developing interactive dashboards, ETL processes, and BI solutions. Experienced in analyzing **sales, financial, customer, and operational data** and translating complex data into clear, actionable insights. Currently strengthening advanced BI capabilities through **hands-on projects and capstone experience**. Strong background in **sales, marketing, operations, and cross-functional collaboration**.

TECHNICAL SKILLS

Business Intelligence & Visualization: Power BI (Desktop & Service), DAX, Power Query, M Language, Tableau, Excel (Advanced: PivotTables, XLOOKUP/VLOOKUP, Power Pivot, VBA, Macros)

Data Engineering & Databases: SQL (T-SQL, MySQL, PostgreSQL), ETL/ELT Processes, SSIS, Azure Data Factory, Data Modeling (Star/Snowflake Schema), Data Warehousing

Programming & Analytics: Python (Pandas, NumPy, Matplotlib, Seaborn), R Programming, Statistical Analysis, Predictive Analytics, A/B Testing, Financial Modeling

Cloud & Enterprise Platforms: Microsoft Azure (Azure Synapse, Azure SQL, Data Factory), Microsoft Fabric, Oracle NetSuite, API Integration, Cloud Data Platforms

Data Management: Data Cleaning, Data Wrangling, Data Mining, ETL Pipeline Design, Git Version Control

Leadership & Strategy: Executive Dashboard Design, KPI Development, Data Storytelling, Stakeholder Reporting, Agile/Scrum, Cross-Functional Team Leadership, P&L Management, Strategic Planning, Market Analysis, Sales Operations

PROFESSIONAL EXPERIENCE

Power BI Developer / Data Analyst

Colaberry — Remote

September 2025 – Present

- Develop interactive **Power BI dashboards** using DAX, Power Query, data modeling, and row-level security (RLS) for Sales, Finance, HR, and Operations analytics projects.
- Build **ETL workflows** using SQL Server, REST APIs, Excel, and CSV data sources, including data cleaning, transformation, validation, and integration.
- Completed a **Sales Analytics capstone** using \$50M+ in simulated revenue data, analyzing sales performance, customer behavior, and revenue trends.
- Developed **HR analytics dashboards** covering employee attrition, workforce trends, diversity, and related KPIs using Power BI, DAX, and advanced filtering.

- Applied **Python (Pandas, NumPy, and Matplotlib)** for exploratory data analysis, data cleaning, and statistical analysis to support BI reporting.
- Designed and presented dashboard walkthroughs and analytical findings to **simulated stakeholders**, translating technical analysis into clear business insights and recommendations.
- .

Senior Data Analyst — Sales, Marketing & Strategy

Cottonwood Financial — Dallas, TX **Mar 2021 – Feb 2025**

- If this employment information is accurate, I would use:
- Analyzed financial, customer, sales, and loan-related data using SQL Server, Power BI, Excel, and data visualization tools.
 - Developed reports and dashboards to monitor business performance, KPIs, sales trends, and financial metrics.
 - Used SQL and SSIS to clean, transform, validate, and integrate data from multiple sources.
 - Created Power BI reports and dashboards to support business analysis and management reporting.
 - Performed data analysis to identify trends, patterns, and opportunities for improved business performance.
 - Collaborated with business stakeholders to understand reporting requirements and translate them into analytical solutions.

Sales & Marketing Manager | Operations Leadership

KAD Construction PLC — Addis Ababa, Ethiopia

2008 – 2016 (9 Years)

- Led cross-functional operations and strategic planning for a major construction enterprise, managing P&L accountability and directing teams across Sales, Marketing, and Operations departments.
- Developed and executed annual business strategies and market expansion plans using economic modeling, competitive analysis, and demographic trend forecasting to guide executive decision-making.
- Oversaw budget allocation and financial forecasting for multi-department operations, optimizing resource distribution and reducing operational costs by 20% through data-informed process improvements.
- Managed a team of 15+ professionals, implementing KPI frameworks and performance management systems that improved overall team productivity and customer satisfaction scores.
- Directed sales operations and pipeline management, implementing territory planning and performance analytics that improved forecast accuracy and exceeded quarterly revenue targets.
- Designed and executed marketing campaigns and go-to-market strategies aligned with customer demographic analysis, competitive positioning, and brand development initiatives.
- Negotiated high-value vendor contracts and strategic partnerships, leveraging financial analysis to secure favorable terms and expand service delivery capabilities.
- Built foundational Excel-based analytics and reporting systems tracking operational efficiency, project profitability, and customer satisfaction metrics across multiple business units.
- Coordinated inter-departmental projects between finance, sales, logistics, and project management teams to ensure alignment on pricing strategies, inventory planning, and promotional campaigns.

KEY PROJECTS

101 Mortgage Loan Analytics Dashboard | Power BI, DAX, SQL

- Developed a comprehensive mortgage loan analytics solution analyzing 101 active loan records to assess borrower risk profiles, default probability, debt-to-income trends, and portfolio concentration risk.
- Built interactive Power BI dashboards featuring loan-to-value (LTV) ratio monitoring, credit risk tiering, regional lending heatmaps, and repayment performance trends for simulated lending officers and risk managers.
- Engineered complex DAX measures for weighted average interest rates, delinquency rate forecasting, and risk-adjusted return calculations, enabling proactive identification of high-risk accounts before default.
- Integrated multi-source data via Power Query and SQL, implementing automated refresh schedules and data governance protocols ensuring real-time portfolio visibility.

Sales Performance & Revenue Analytics | Power BI, DAX, SQL

- Designed 8 interconnected dashboards for a simulated \$50M retail business, tracking revenue trends, regional performance, product category profitability, and sales pipeline forecasting.
- Implemented advanced DAX calculations for YoY growth, 30/60/90-day moving averages, dynamic Top-N ranking, and variance analysis against budget targets.

HR Analytics & Employee Attrition Prediction | Power BI, Python, SQL

- Analyzed 15,000+ employee records to build attrition prediction models using Python (scikit-learn, Pandas) integrated with Power BI for interactive, drill-down visualization.
- Created diversity dashboards, tenure analysis reports, and satisfaction correlation matrices, enabling simulated HR leadership to proactively address retention risks.

Financial KPI Tracker & Budget Variance Analysis | Power BI, DAX, Excel

- Architected a complete financial reporting system featuring P&L summaries, budget vs. actual variance analysis, cash flow waterfall charts, and margin trend tracking.
- Implemented automated data refresh via Power Query connecting to SQL Server and Excel sources, with conditional formatting alerts for threshold breaches.

Customer Segmentation & Cohort Analysis | Python, Power BI, SQL

- Performed RFM (Recency, Frequency, Monetary) analysis on 100K+ e-commerce transactions using Python Pandas, segmenting customers into high-value cohorts.
- Built interactive Power BI dashboards showing retention rates, lifetime value trends, and acquisition channel performance, projecting a 25% improvement in campaign ROI.

EDUCATION

Bachelor of Science in Information Technology

Addis Ababa University — Addis Ababa, Ethiopia | 2012 – 2016

- Coursework: Database Management, Systems Analysis, Software Engineering, Network Administration, IT Project Management, Data Structures, Programming Fundamentals
- Completed degree while working full-time in operations and sales leadership at KAD Construction PLC

Bachelor of Science in Economics

Alpha University College — Addis Ababa, Ethiopia | 2004 – 2008

- Coursework: Econometrics, Financial Economics, Statistics, Market Analysis, Macroeconomic Theory, Business Strategy, International Trade, Microeconomics

Data Analytics & Business Intelligence

Colaberry School of Data Analytics — Remote | 2025\||||

- Completed intensive 500+ hour curriculum covering Power BI, DAX, SQL, Python, data modeling, ETL/ELT processes, cloud platforms, and executive data storytelling

- Executed 5+ real-world capstone projects simulating enterprise BI environments across Sales, Finance, HR, Supply Chain, and Mortgage Lending
- Trained in Agile methodologies, stakeholder communication, and C-suite data presentation techniques

CERTIFICATIONS & CREDENTIALS

- Certified Data Analyst — Colaberry School of Data Analytics | 2024

Credential ID: 1910920254578360441973

Power BI: Integrating AI — LinkedIn Learning | 2026

Power BI: Data Visualization and Dashboard Tips, Tricks, and Techniques — LinkedIn Learning | 2026

- Power BI Data Visualization and Dashboard Tips, Tricks, and Techniques

Issued September 2026
